1. This animal is being sold as a Top-Quality bloodline Rottweiler. The puppy is yours and you can do as you like with your new addition as long as it is properly cared for. There are some genetic traits that are indicative to the breed which are acceptable for breeding and characteristics that are listed as disqualifying faults of the Rottweiler standard for breeding with the ARC if you intend to breed this puppy. This puppy is considered healthy and has not been exposed to any viruses and therefore cannot guarantee for any if the puppy contracts one. The new owner must also take precautions not to take the new puppy anywhere they might contract a virus or bacteria.

This animal is being sold as a Family member; since the puppy is only \_\_\_\_\_ old and cannot predict how this puppy will turn out as an adult. Breeding a Rottweiler in the USA is at 2 years of age. If you intend to breed in the USA it cannot be used for breeding until he/she is 2 years old and have no disqualifying faults according to the ARC standard. The evaluation of any faults or imperfections at time of purchase will be written on the health certificate or this contract for the new owner to be aware of \_\_\_\_\_.

*The medication/shot schedule included in our contract and any additional paperwork was designed with the help of numerous Universities and Immunologists at Boehringer Ingelheim and Veterinary Medical specialists. This schedule is updated periodically when veterinary medical research warrants it. It has always been and always will be the mission of Von Evman Rottweilers to provide our dogs (children) and their masters (owners) with the best and most up-to-date information.*

3. Feeding. Our puppies are fed a mixture of Pro Pac dry dog food with egg, cheese, yogurt or cottage cheese, rice, fresh meat, garlic & olive oil, kelp & "Total Complete Canine" which have all the vitamins, antioxidant & Joint formula needed. When the puppy is almost two years old, adult dry food should be given with the same ingredients. Your Rottweiler should always receive Total Complete Canine and Kelp daily throughout its life. Flor Essence Tea is needed for older dogs as an antioxidant and Cancer preventative. You can contact us on obtaining these supplements or visit our website, [www.vonevmans.com](http://www.vonevmans.com), to order. You should never feed your dog plain, dry dog food. Fresh Meat and Cooking for your dogs are mandatory.
4. Temperament Development. The temperament in Rottweilers are particularly determined by the genetic traits passed on by the parents and mostly environmental as he/she grows up in your home. What you do, how the puppy adapts and is treated will greatly affect how he/she will act when they are older. We want dogs that are protective in nature yet good around children, family, and friends. Never wrestle, play hard, tease or aggravate your puppy. Soft slow strokes and petting is how you touch your puppy. We feel that temperament and socialization are directly related to each other and we spend a great deal of time socializing our puppies until they go into their new homes. The puppies are held, caressed, and exposed to different situations and sounds both with and without their litter mates. Based on our \_\_\_\_\_ week observation of your puppy, we feel that this puppy if treated friendly and loving and listen to advice written above, will have the temperament to do the following:

*Good around family and friends*

*It must be pointed out that Schutzhund, police, obedience, protection, tracking, therapy and service training, etc. are just that - training. No dog can just walk on a field and do these things. They must be trained and trained correctly. We can sell you a dog with a good potential to do these things, but it is up to you to develop this potential in your dog. We would also like to point out the fact that there are many good but more bad dog trainers in the world, and some use rather insane methods to train dogs. Don't do anything crazy to your dog no matter who tells you to do it! We will be more than happy to help you with training ideas or good people to train with. Please do not wrestle with your puppy, let him bite on you or chain him up. Soft slow pats & caressing will keep your dog calm & clear minded so when he grows up, he will be good natured.*
